Headline: species-annotated supported clusters, >=2 ASVs, HOMD-uncaptured (17 clusters, 96 derep ASVs)
one row per multi-ASV cluster | ordered by max subject-level prevalence | box = per-ASV subject prevalence (singleton clusters excluded) | HOM
15795 | Faucicola mancuniensis
15805 | Pseudoalteromonas luteoviolacea_G
7147 | Anaerobacillus isosaccharinicus
19843 | Aquabacter cavernae
31920 | Roseburia inulinivorans
16086 | Schleiferilactobacillus harbinensis
40654 | Alteromonas mediterranea
15882 | Rhodanobacter glycinis
21350 | Fructilactobacillus sanfranciscensis
28618 | Planktomarina temperata
36553 | Phnomibacter ginsenosidimutans
5422 | Megamonas funiformis
9690 | Selenomonas ruminantium_E
29573 | Helicobacter pylori_CI
14392 | Pedosphaera parvula
29601 | Lentibacter algarum
46270 | Gemmiger qucibialis
